---

I remain sceptical. The release date proves nothing: for a while, it was listed as to be released in May 2007 on the Arktis page.

2. [blitzkrieg game board](#)
3. [blitzkrieg gameplay](#)

That German Mac games you linked (Games4Mac) actively tried to get some information and even asked CDV – who denied a Mac version.. That surely would be a surprise But as I said: after more than a year there is still no substantial prove.. It seems that Application Systems – which is the RuneSoft's German distributor – also had the game for a while on their page and removed it.
